SKILLS

MARKETING TECH
Braze, Punchh, Branch, Movable Ink
DEVELOPMENT
HTML, CSS, JavaScript, GitHub
SCRIPTING & LOGIC
Liquid Logic, dynamic variables, conditional checks
AI & AUTOMATION
Gemini API, Prompt Engineering, QA Automation, AI Persona Simulation
METHODOLOGIES
A/B Testing, User Journey Design, Deliverability, QA Automation

MARINA ZUBTSOVA
CAMPAIGN MANAGER

PROFILE

Technical Campaign Manager with 2+ years of experience executing high-impact lifecycle and promotional campaigns using Braze. Expert in trigger-based journeys, segmentation, and advanced personalization using Liquid, HTML, and CSS. Specializes in building generative AI developer utilities to automate campaign workflows, stress-test dynamic copy, and run pre-deployment QA audits.

EMPLOYMENT HISTORY

- Campaign Manager, PublicisMay 2023 — Oct 2025
- Executed multi-channel lifecycle campaigns for Dairy Queen using Braze, increasing unique open rates by 30% within 12 months.
 - Architected and maintained trigger-based customer journeys (Birthday, Onboarding, and Win-back flows) within Braze Canvas.
 - Coded responsive, email-compliant templates using HTML, CSS, and complex Liquid personalization logic, driving a 5% MoM increase in subscriptions and opt-ins.
 - Built and deployed custom React developer tools integrated with the Google Gemini API to run automated copy sync audits and personalization stress-tests, reducing template QA cycle times.
 - Deployed multi-channel campaigns through partner integrations with Branch and Movable Ink, enhancing dynamic personalization.
 - Optimized engagement metrics through A/B testing, behavioral targeting, and segmentation, increasing CTR by 10%.
 - Coordinated deliverables for 15+ campaign launches per month across creative, engineering, client-side QA, and account teams.

- IT Recruiter, Zenith Systems SolutionsMay 2021 — Oct 2021
- Sourced, screened, and qualified technical and IT engineering candidates, improving candidate pipeline efficiency.
 - Conducted initial interviews to evaluate technical skills (frontend, backend, QA) and cultural alignment with client teams.

KEY PROJECTS

- OmniQA for Braze (React, Vite, Gemini API)
- A campaign QA dashboard featuring a unified diagnostics log, Monaco HTML editor, and one-click **Auto-Fix HTML engine** resolving WCAG contrast/link issues. Integrates multi-channel previews (Email, Push, SMS, IAM), dynamic pre-approval and readiness checklist customization, and catalog matching via parsed Braze IDs. Exports print-ready PDF audit reports.
- OmniPulse (React, Vite, Gemini API)
- A post-send campaign analytics dashboard for visualizing click hotspots, auditing dynamic Liquid logic branches, and calculating statistical lift. Integrates deliverability checks and an AI post-mortem report generator using the Gemini API to turn performance metrics into optimization insights.
- SmartCanvas AI (React, Gemini API)
- An interactive campaign builder sandbox with client-side Liquid parsing, dynamic personalization variables, and copy variant generation. Features AI target-audience simulation using dynamic buyer personas that critique and score subject lines in real time.
